CLEANING INSTRUCTIONS - ON GLASS RETROFIT

Thank you for choosing our bird protection solution. By doing so, you are making an important contribution to species protection. To ensure that your panes are also protected against bird strikes in the long term, we ask you to observe the following cleaning instructions:

- Do not clean the pane surface **for the first four weeks** after applying the dot grid
- First, remove coarse impurities carefully with plenty of **clean water**
- Use only **pH-neutral**, liquid cleaning agents with no solid content
- Do not use abrasive or chemical cleaning agents
- Use **soft** cloths or sponges and/or a window wiper with a **soft** rubber lip
- Refrain from using sharp or rough objects and rotating brushes
- Please use **plenty of clean water** (change it several times during cleaning if necessary)

Please timely direct our care instructions to your employees and your cleaning company. You will appreciate our film for many years. **The birds will thank you.**

Kind regards,

SEEN AG
